SAIBHARGAV KARNE

Dynamics 365 & Power Apps Developer

Dallas Texas | (940) 368-1088 | saibhargavkarne08@gmail.com | https://www.linkedin.com/in/sbkarne/

PROFESSIONAL SUMMARY

Power Platform Developer with 5+ years of experience, including 2+ years of hands-on expertise in Power Automate (Cloud & Desktop) for building scalable enterprise automation solutions. Skilled in designing workflows using triggers, actions, expressions, variables, loops, and conditions, with strong experience integrating SharePoint, Outlook, Teams, OneDrive, Dataverse, SQL, Excel, and REST APIs. Proven ability to implement approval workflows, error handling, retries, and monitoring mechanisms to ensure reliable automation. Experienced in debugging, optimizing flows, and supporting UAT and production environments while adhering to governance and security standards.

EMPLOYMENT HISTORY

✤ Lead Power Platform Developer, Kraft Heinz ……. Sep 2025 — Present

Chicago - Remote

Project: PO Management

- **Developing a centralized Power Apps Canvas application** to streamline the entire Purchase Order life cycle, reducing manual effort and improving approval turnaround time across 30+ plants.
- Designed and developed **Power Automate Cloud and Desktop flows** to automate business processes including approvals, notifications, and data synchronization across systems.
- Built **end-to-end automated workflows integrating SharePoint, Outlook, Teams, OneDrive, Dataverse, SQL, and Excel**, reducing manual effort and improving operational efficiency.
- Built automation pipelines integrating **SAP, SharePoint, and external APIs** using Power Automate and custom connectors.
- Developed **approval-based workflows with multi-level routing, conditional logic, and dynamic assignments**, improving turnaround time for business processes.
- Implemented **robust error handling using scopes, try-catch patterns, retries, and failure notifications**, ensuring high reliability of production flows.
- Created and consumed **REST APIs and custom connectors** to integrate third-party systems with Power Automate using JSON payloads.
- Own ALM/DevOps across Dev/Test/Prod (solutions, connection references, environment variables, managed deployments) and lead change management through testing and release.
- Designed custom Dataverse + D365 CRM schema for PO lifecycle, including custom tables, relationships, business rules, and security roles.
- **Automating business processes using Power Automate flows,** including complex approval routing, status updates, and notification mechanisms.
- **Contributed to significant cost savings of over $1 million per quarter** by eliminating manual entry errors and approval delays through automation.
- Working on Azure Integration to enable data driven insights to track app usage, performance metrics and user behavior analytics.
- Built integrations across **Power Apps + SAP + SharePoint + Azure** using **REST APIs + custom connectors**, and optimized datasets using **SQL queries**.
- **Implementing advanced logic with Power Fx and JavaScript** to deliver dynamic, user-friendly, and high-performance app experiences.
- Regularly worked with **business stakeholders + product owners** to convert requirements into **architecture, user stories and technical designs**.

✤Dynamics 365 CRM & Power Platform Developer, Microsoft June 2023 — Sep 2025

Seattle - Remote

Project 1: SLOP (Store Level Operational Processes) Application

- **Designed, developed, and deployed a Power Apps Canvas application** to digitize and streamline daily retail operations across **17 Experience Centers,** serving over **200 active users.**
- **Designed flows using advanced expressions, variables, loops (Apply to Each), conditions, and parallel branches to handle complex business logic.**
- **Optimized flow performance by reducing unnecessary loops, improving trigger conditions, and minimizing API calls, improving execution efficiency.**
- **Troubleshot and debugged flows using run history, outputs, and expression evaluation, resolving production issues and improving stability.**
- **Developed complex Power Automate flows for approvals, status updates, notifications, vendor contract workflows, and business process automation.**
- **Automated end-to-end store workflows** including **shift management, sales monitoring, inbound deliveries, customer entry queue tracking, and issue escalation,** reducing manual workload by **60%.**
- **Reduced operational service risk by $2M** and **optimized working capital by $10M** through real-time visibility, automated reporting, and improved process accuracy.
- **Enhanced app performance by 40+ seconds,** using delegation-friendly queries, preloaded collections, and efficient screen rendering, resulting in higher user satisfaction and engagement.
- **Developed C# plugins to enforce business rules, ensure data integrity, and synchronize Dataverse with external operational systems.**

Project 2: Contract Coverage

- **Built a Canvas App for Vendor Contract Coverage,** enabling store managers to review vendor performance, decide on renewals or cancellations, and automate workflow approvals through Power Automate.
- **Integrated Power Automate workflows and custom API connectors** to automate vendor contract approvals and real-time status updates between Power Apps, Dataverse, and SAP systems.
- **Collaborated with procurement and finance teams** to ensure contract data accuracy, compliance alignment, and seamless synchronization through REST API-based data exchange.
- Strong Azure integration exposure: **Azure Functions, Logic Apps, Application Insights + REST/OData APIs**.
- Implemented **Dataverse security roles** and designed permission model; also configured **field-level permissions** in sensitive banking workflows.
- Performed unit testing, UAT support, and defect fixes for automated workflows before production deployment.
- Supported production incidents and enhancements, ensuring minimal downtime and quick resolution of automation failures.
- Improved performance by **40+ seconds** through delegation optimization, preloaded collections and efficient screen rendering; ongoing performance optimization initiatives.
- Followed **Power Platform governance standards including naming conventions, connection references, and environment variables** for maintainable solutions.
- Documented **flow architecture, trigger conditions, and integration points** for knowledge transfer and long-term support.

✤Dynamics CRM/Power Apps Developer, Accenture …… May 2021 — Aug 2022

Hyderabad, India

Project 1: Retail Store Performance Tracker

- **Developed a Power Apps Canvas application** for Adidas store managers to track **daily sales performance, inventory levels, and customer footfall** across multiple retail locations.
- Designed and integrated flows with **Microsoft Dataverse for CRUD operations and business process automation**.
- **Integrated SAP and Dataverse data sources** to provide real-time insights on store revenue, sales targets, and category-wise product performance.
- **Embedded Power BI dashboards** within the app to visualize sales trends, forecast accuracy, and promotional campaign effectiveness.
- Owned **ALM/DevOps across Dev/Test/Prod**, including solutions, connection references, environment variables, managed deployments, testing and release.
- **Automated low-stock and below-target alerts** using Power Automate flows, improving replenishment accuracy and operational responsiveness.
- **Optimized app performance and user interface** through delegation-friendly queries and intuitive layouts, resulting in **a 40% improvement in data load time and user adoption.**

Project 2: D365 Marketing Application

- **Developed and customized Microsoft Dynamics 365 Marketing application** for Adidas, tailoring core module to align with their global retail sales and logistics operations.
- **Built a Model-Driven App** for Adidas' sales teams to manage the full **lead-to-opportunity lifecycle,** including lead creation, qualification, tracking, and automated email notifications via **Power Automate flows** and **Outlook connectors.**

- **Designed custom Dataverse entities, relationships, forms, and business rules** to extend standard Dynamics 365 functionality and capture region-specific data for Adidas' retail network.
- **Integrated truck delivery tracking within the Sales module,** allowing users to monitor delivery status and link shipments directly to corresponding opportunities and invoices.
- **Developed custom C# plugins** to handle complex business logic — for example, automatically updating opportunity stages and sending alerts when delivery records were delayed beyond SLA thresholds.

✤ Power Apps / Dynamics CRM Developer, Airen Technologies LLC …….. Dec 2019 — May 2021

Hyderabad, India

Project: COP (Customer Onboarding Process) & Manager Process Automation Application

- **Involved in building a hybrid Power Apps solution (Canvas + Model-Driven)** to support **customer onboarding, loan processing, and account management** workflows for a banking client.
- **Worked on a Canvas App** used by front-office teams to collect **KYC details, loan requests, and supporting documents,** integrated with **SharePoint** for secure document handling.
- Implemented **advanced Power Fx logic** and formulas to deliver dynamic, high performance user experience.
- **Assisted in developing a Model-Driven App** for back-office users to manage **loan approvals, track application status, and monitor portfolios** using **Dataverse workflows and business rules.**
- **Created Power Automate flows** to send **loan approval notifications, trigger credit-check requests,** and automate email alerts using Outlook and REST APIs.
- **Configured role-based security and field-level permissions** in Dataverse to ensure sensitive financial data was only accessible to authorized users.
- **Helped implement data validation and user access controls** to comply with internal banking security policies and data protection standards.

EDUCATION

✤ **University of North Texas** ..... . Aug 2022 — Dec 2023

Masters in Information Systems and Technology 3.8 GPA *Denton TX*

✤ **JNTUH – TKR College of Engineering and Technology**……...June 2017 – May 2021

Bachelor's in Computer Science and Engineering 3.6 GPA *Hyderabad, India*

TECHNICAL SKILLS & TOOLS

SharePoint & Excel as Data Sources .....
Power BI .....
JavaScript / TypeScript for Client-Side Customization .....
Dynamics 365 CE (Sales, Customer Service, Marketing) .....
REST / OData API Integration & Custom Connectors
Copilot Automation

Power Automate .....
Plugin & Workflow Development (X++, C#, .NET) .....
Azure Logic Apps, Azure Functions, Application Insights .....
ALM / DevOps Pipelines for Power Platform Deployments ...
Salesforce & SAP Integration
Python

✤ **CERTIFICATIONS** …….. .....

Microsoft Certified: Power Platform Fundamentals

Status – Active (Online Verifiable)

Credential ID: 1A0F2BF590189A86

Certification number: 8A0CLF-623514

Earned on: October 8, 2024

Microsoft Certified: Power Platform Functional Consultant

Status – Active (Online Verifiable)

Credential ID: C16B0ED725B5AF0

Certification number: I99185-217455
